Post-doctoral Fellowship

Stock Assessment of blue crab in Chesapeake Bay Available: Immediately

Chesapeake Biological Laboratory is currently seeking a post-doctoral fellow for a 2-year NOAA award to work on developing the next stock assessment for blue crab in Chesapeake Bay. The post-doc will work on developing a two-sex assessment model and developing the framework for a spatially-explicit assessment in the future. The successful applicant would join a multidisciplinary team involving scientists at CBL, VIMS, SERC and Maryland DNR. The position requires demonstrated, strong quantitative skills in developing assessment models using ADMB. The post doc would be expected to develop a two-sex model for the upcoming and assessment. Subsequently, the post-doc would be expected to explore alternative frameworks for future assessments. The post doc would be expected to develop publications based on the results of the assessment.

The post-doc would be resident at the Chesapeake Biological Laboratory, situated on the western shore of the Chesapeake Bay about 50 miles south east of Washington DC. A competitive salary and benefits package is available.

For more information, please phone Dr. Tom Miller (410) 326-7276. To apply, please send a statement of interest, resume and names of three references and samples of publications to Dr. Tom Miller - miller@umces.edu, reference: Assessment.

The University of Maryland System is an ADA/AA/EOE employer. Women and minorities are encouraged to apply.
